

Weather/Emergency Procedures

Information concerning closings, delayed openings, and early dismissals are posted on local television stations, television web sites and the district website. Parents who have not “opted-out” of the T/E all-call system will also receive a recorded message with weather or emergency information.

The TESD hotline number is 610-240-1970. As updates occur the message will be updated on closings, delayed openings, and early dismissals.

TESD Schools - Closed:

When TESD schools are closed due to weather conditions or other emergencies, no district transportation will be provided, this includes non-public school students.

TESD Schools - Delayed Opening:

If TESD experiences a delayed opening due to weather or another emergency, all transportation, including non-public transportation, will also be delayed.

TESD Schools - Early Dismissal:

If the school district deems the weather conditions to be a safety issue during the school day and public schools close early, non-public schools will be notified to release their students for early transportation home.

Non-Public Schools - Delayed Opening/ Early Dismissal:

If a non-public school experiences a delayed opening due to weather or other emergency or deems the weather conditions to be a safety issue during the school day and closes early, please contact the Transportation Department to confirm transportation arrangements.

Please keep a copy of this information handy for easy reference throughout the year.

Thank you!
